Introduction

The purpose of this report is to provide the Audit, Risk and Governance Committee (ARG) with a progress report on the appropriateness and effectiveness of the Shire’s systems and procedures in
relation to risk management, internal controls and legislative compliance (Local Government (Audit) Regulations 1996).

Relevant Previous Decisions of Council

ARG001/06/17 – Audit Regulation 17 Improvement Plan Progress Report presented to Council 26 June 2017.

Background

On 8 February 2013, amendments to the Local Government (Audit) Regulations 1996 extended the functions of the Local Government Audit Committees. The inclusion of Regulation 17 requires the Chief Executive Officer to review the appropriateness and effectiveness of the Shire’s systems and procedures in relation to risk management, internal controls and legislative compliance every two calendar years. The results are then reported to the ARG Committee.

At the Ordinary Council Meeting, 19 December 2016, Council considered the review of Risk Management, Internal Controls and Legislative Compliance pursuant to Regulation 17 of the Local Government (Audit) Regulations 1996, and resolved as follows:

OCM234/12/16 COUNCIL DECISION / Officer Recommendation

Moved Cr Rich, seconded Cr Gossage

That with respect to the review on the appropriateness and effectiveness of the Shire’s systems in regard to Risk Management, Internal Control and Legislative Compliance, as required under Regulation 17 of the Local Government (Audit) Regulations 1996, Council:

1. Receive the results of the review provided by the CEO under section 17 (3) of the Local Government (Audit) Regulations 1996 being the Improvement Plan contained in OCM234.1/12/16;

2. Note that the Shire will present to the Audit Committee a quarterly management review of the Improvement Plan as a standing item;

3. Note that the Shire will develop an audit work plan and internal audit charter to be considered by the Audit Committee at a later date.

A cumulative total of 61 framework components and actions items were identified to increase procedural and system effectiveness in accordance with legislative requirements.

The initial status report was presented to the Audit Committee on 20 March 2017. The Improvement Plan Progress report was presented to the Audit, Risk and Governance Committee on 6 June 2017. The items reported against identified issues with respect to risk management, legislative compliance and internal controls.

The TAG will be meeting in the month of October 2017 to identify all relevant Officers requirements to effectively communicate and implement the objectives outlined in the Regulation 17 “The Improvement Plan” throughout the organisation.

Risk Ratings have been determined with respect to probability and or consequences of adverse outcomes if action is not taken. Potential adverse outcomes may be quantitative impact (for example financial loss) or qualitative impact (for example inefficiency, non-compliance, poor service to the public or loss of public confidence).

A risk is often specified in terms of an event or circumstance and the consequences that may flow from it. An effect may be positive, negative or a deviation from the expected and may be related to the following objectives; occupational health and safety, financial, service interruption, compliance, reputation and environment. A risk matrix has been prepared and a risk rating of 6 has been determined for this item. Any items with a risk rating over 10 (considered to be high or extreme risk) will be added to the Risk Register, and any item with a risk over 17 will require a specific risk treatment plan to be developed.

A risk is often specified in terms of an event or circumstance and the consequences that may flow from it. An effect may be positive, negative or a deviation from the expected and may be related to the following objectives: occupational health and safety, financial, service interruption, compliance, reputation and environment. A risk matrix has been prepared and a risk rating of 4 has been determined for this item. Any items with a risk rating over 10 (considered to be high or extreme risk) will be added to the Risk Register, and any item with a risk rating over 17 will require a specific risk treatment plan to be developed.
