

Street Tree Species

WA Peppermint

Agonis flexuosa

SJ Native

Height: 10m

Canopy: 3-5m

Regular, compact shape with wide canopy and weeping habit.

Attractive masses of white flowers.

Forms thick, ornamental trunk in later life. Leaves smell strongly of peppermint. Suitable for any soil type.

Good street tree for verges or garden feature, providing effective shade. Responds well to pruning.

Flooded gum

Eucalyptus rudis

SJ Native

Height: 5-20m

Canopy: 4m

Irregular, open shape with wide canopy. White flowers during Winter to Spring.

Fast growing.

Bird & insect attracting.

Suitable for heavy soils, prefers wet sites and watercourses.

Suitable for wider verges, rain gardens, and larger parks and reserves.

Wandoo

Eucalyptus wandoo

SJ Native

Height: 25m

Canopy: 15m

Irregular, open shape with wide canopy, attractive pale smooth bark & white flowers.

Can be slow growing.

Great habitat tree for all types of fauna. Bird and insect attracting.

Suitable for gravelly soils.

Suitable in wide verge or rural settings, along with parkland areas.

Moonah/Stout Paperbark

Melaleuca preissiana

SJ Native

Height: 2-9m

Canopy: 3-5m

Regular, compact shape with wide canopy, feathery foliage and papery bark. Profuse white flowers over a short period. Suitable for heavy soils, prefers wet sites and watercourses.

Can be slow growing

Bird and insect attracting

Great for rain gardens & swales, and in narrow verges.

Street Tree Species

Red Flowering Gum

Corymbia ficifolia

WA Native

Height: 10m

Canopy: 2-5m

Regular, compact shape with wide canopy, profuse red flowers (varying from pink to red and orange)

Excellent street tree or garden specimen. Suitable for parks and gardens, verges and medians.

Reasonably fast growing.

Bottlebrush Kings Park Special

Callistemon sp.

WA Native

Height: 4m

Canopy: 4m

Compact evergreen foliage.

Free flowering bottlebrush with bright red flower heads that are very attractive to nectar loving birds and insects

Hardy for all soil types

Ideal for narrow verges to create colour and seasonal interest.

Darling Range Ghost Gum

Eucalyptus laelae

WA Native

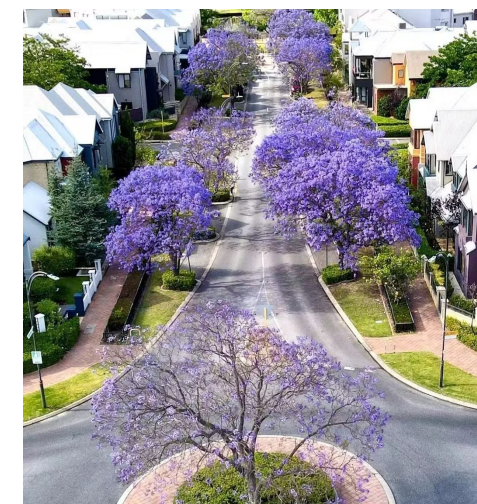

Height: 10-20m

Canopy: 6m

Medium sized tree with smooth white trunk and masses of white flowers in Summer.

Attractive to birds and insects

Great shade tree in Parks and larger verge areas

Jacaranda

Jacaranda mimosifolia

Exotic

Height: 15m

Canopy: 10m

Prefers most soils in a full sun position.

Very showy when in full bloom. Long lasting violet coloured flowers from October to November before leaves develop.

Native to South America

Street Tree Species

Coral Tree

Erythrina indica

Exotic

Height: 10m

Canopy: 10m

Medium sized showy deciduous tree with smooth grey bark and short lived red pea like flowers.

Flowers open to vibrant fiery red blooms over the tree.

Attractive to birds and insects

Wide spreading canopy, good for wide verges, to create avenues of bright red colour.

Liquidambar Sweet Gum

Liquidambar styraciflua

Exotic

Height: 15-20m

Canopy: 12m

Deciduous tree grown for its shape and foliage. Distinctive star shaped leaves, turn scarlet, yellow, orange, or purple in Autumn.

In Spring it produces unique flowers and woody fruits.

Drought hardy
