SJ Local Food Action Plan Community Survey

The data compiled from this survey will be used to draw up a Local Food Action Plan that will help shape the delivery of healthy food environments in the Shire.

Please rate the following based on their level of importance to you, on the scale of 1 to 5 (1 – extremely unimportant; 5 – extremely important)

(Required)

Questions	1	2	3	4	5
A comprehensive local healthy food businesses directory and list highlighting location of local community kitchens and public barbecues within the Shire					
There should be an awards or recognition program that assesses local food businesses on measures they are taking to provide safe and healthy food to the community, including price, placement and healthy and unhealthy food					
Healthy options should be available at canteens and barbecues of local sports and community groups					
The Shire should support community groups to access health promoting grants					
Healthier food choices should be provided, and unhealthy food options limited at supported community events					
Local communities should have access to health-promoting sponsorship options for events					
Workshops / programs on gardening, worm farming and composting in home food gardens					
Workshops / programs on food waste management and food sustainability					
Workshops / programs on food safety, nutrition, cooking, shopping					
Local schools and/or early learning centres within the Shire should commit to reducing waste, and work towards becoming an accredited Waste Wise school					
Local schools and/or early learning centres within the Shire should deliver programs which improve skills to grow and prepare healthy foods					
Local schools and/or early learning centres within the Shire should support students to get active by increasing walking, scooting and riding to school					
The Shire's public open spaces (i.e. parks) should have accessible potable water					
The Shire should become a Breastfeeding Friendly Community by reducing stigma and providing safe spaces for breastfeeding mothers					
Networking opportunities related to improving the health and sustainability of food environments should be researched, resourced and engaged in					
A policy should be developed to remove advertising that promotes unhealthy foods and drinks from publicly owned and managed settings, such as bus stops, benches and sporting grounds					
Tourism opportunities and projects which feature local food producers should be promoted					
Health and social services should be supported to prioritise the prevention of obesity-related chronic disease					
Older adults, health and community workers should be educated on injury prevention and recovery support through healthy foods					

Do you have any additional suggestions for actions that could be taken to increase and improve healthy food environments?
