

Condition B and C - Justification

Photos have been taken with Ryan and Andrew on site Monday 10/7/23 17:50 and been sent through in email and confirmed.

The lights that have been angled down clearly demonstrates the reduction in light spill into adjoining properties, in comparison to previous photos taken of the Light spill.

As Requested, discussed with SAT.

The condition of using the lights from 6pm to 8pm needs to be amended to enable us to be able to use the lights at various times but no later than 8pm as through the year the sunset hours change and is the safety of us riding.
