

SUMMARY OF SUBMISSIONS**PA22/936 – Lot 5, 566 South Western Highway, Darling Downs - Amendment to Approved Abattoir**

Submitter	No	Submitter Comments	Officer Comment
		<p>from the current site? Given the increase in production, what comparative studies are available? As local residents we strongly object to an increase in production as the negative effect to quality of life and the risk to the local environment is too great.</p>	
	101.	<p>Thank you for putting this on Your Say, I appreciate the opportunity to comment.</p> <p>I have lived in this suburb for over 10 years and have to put up with the smell of the animals all the time. It is particularly bad when the wind is blowing in a certain direction which is quite often.</p> <p>There are also new homes being built near the abattoir off Butcher Road and I often go there for walks. The smell is so bad and I have talked to owners of the new properties who say that they can't build on the front part of their property due to an exclusion zone, which is in place as a result of the current smell of the abattoir. This cannot be good for peoples health and an increase in production by x 3 times will make this even worse.</p> <p>Please think about your rate payers. I know of so many people that would greatly appreciate that place being shut down. There are petitions going around at the moment in my neighbourhood and surrounds to have our voice heard.</p> <p>Thank you for your time.</p>	<p>Officers consider that the management of odour has not adequately been demonstrated as part of the application as detailed in the relevant section of the report.</p>
